EDUCATION

2022- 2025

UNIVERSITY OF PLYMOUTH

- BSc (Hons) Computer Science

2022

NSBM GREEN UNIVERSITY

- Advanced certificate course

2020

PHYSICAL SCIENCE STREAM

- Completed G.C.E. A/L

2017

ENGLISH MEDIUM

- Passed G.C.E. O/L

SKILLS

PROFESSIONAL

- UI/UX Design: Figma
- Frontend: React.js, HTML, CSS, Flutter (Dart), Python
- Backend & Databases: Firebase (Realtime DB & Firestore), MYSQL
- Tools & Testing – Postman, GitHub

PERSONAL

- Leadership qualities
- Fast Learner
- Team Collaboration

LANGUAGES

- Sinhala (Native)
- English (Fluent)

REFERENCE

Mr. Gayan Perera

Lecturer – Computer Science NSBM
Green University

Email : gayan.perera@nsbm.ac.lk

PROFILE

Creative and detail-oriented Computer Science undergraduate with a strong foundation in UI/UX design and frontend development. Passionate about building intuitive, responsive, and accessible digital experiences. Skilled in turning ideas into clean, user-centered interfaces and solving real-world problems through thoughtful design and development. Eager to contribute to innovative projects and grow within a collaborative, technology-driven environment.

PROJECTS

Studyspot (AI-Based learning System)

- A personalized e-learning platform that adapts content based on student performance to improve engagement and learning outcomes.
- My Contribution: Led the end-to-end design and development of the system.
- Technologies: Figma, React.js, Firebase, TensorFlow.js, HTML, CSS

Elephant Pulse (Wildlife Safety Platform)

- An IoT-based system that uses sensors and image processing to detect elephants near railway tracks in real time, aiming to reduce train collisions and protect wildlife.
- My Contribution: Designed the app UI.
- Technologies: Figma, Flutter (Dart), Python, OpenCV, Arduino, Firebase, GPS

Purple Palace (3D Furniture E-Commerce Platform)

- An interactive e-commerce web platform that allows users to customize and visualize furniture placement in a virtual 3D room before purchasing.
- My Contribution: Designed the UI and assisted with frontend development.
- Technologies: Figma, React.js, Three.js, JavaScript, Usability testing

Green Library (Library Management System)

- A system built to automate book reservations, user notifications, and overdue alerts for a university library.
- My Contribution: Designed the UI.
- Technologies: Figma, C#, MySQL

Stylora (Full-Stack E-Commerce Web App)

- A full-stack web application for browsing, purchasing, and managing fashion products with features like real-time chat, cart management, and secure login.
- My Contribution: Led the UI/UX design.
- Technologies: React.js, Node.js, Express.js, MongoDB, JWT, Docker, GitHub

Medic Aid (Medication Access Mobile App)

- A location-based mobile app developed to help users quickly access nearby pharmacies, available medicines, and blood donors with real-time updates.
- My Contribution: Designed the app UI and developed the frontend.
- Technologies: Figma, Flutter (Dart), Firebase, Google Maps

Green Events (University Event Ticketing)

- A responsive platform for managing university event listings and real-time ticket updates.
- My Contribution: Designed the app UI and assisted with frontend development.
- Technologies: Figma, HTML, PHP, Firebase

Green Pass (University Event Ticketing App)

- A mobile app for browsing events, purchasing tickets, and validating entry in real time.
- My Contribution: Designed the app UI.
- Technologies: Figma, Flutter (Dart), Firebase

Green Stay (Student Accommodation Portal)

- A web platform to help students search for and manage accommodation more efficiently.
- My Contribution: Developed the backend .
- Technologies: Figma, HTML, CSS, PHP, JavaScript, MySQL
